EXPERIENCE

September 2021 - Current
C# Developer, *Macrobond Financial*

- Developed C# console-applications to automate data collection, from large macroeconomic sources such as ECB, IMF, Eurostat, World Bank, OECD, among thousands of others, into the internal database (backend).
- Maintained and improved internal framework (backend).
- Based on user feedback, worked on main internal software application to apply new features, and fix existing ones using WPF framework (frontend). This is the main tool used by Data Analysts at Macrobond, designed to administrate and modify data.
- Engaged in code review processes to learn new concepts and receive/give feedback for continuous improvement.
- Used Scrum methodology as a base for daily work, by participating in team meetings and collaborative activities, including stand-ups, retrospectives, and social gatherings with other development teams.
- Training and mentoring junior developers.

August 2018 – September 2021
Data Analyst, *Macrobond Financial*

- Experienced in thoroughly analyzing and curating macroeconomic data.
- Proficient in database administration.
- Joined internal automation team, building user friendly configurations to automate simple data extractions.

November 2016 – August 2018
CS Strategic Accounts Representative, *TNT/FedEx*

- Responsible for gathering and analyzing stock data from CISCO's EMEA warehouses to facilitate quarterly Physical Cycle Counts.
- Developed Excel models to analyze productivity in the claims department, leading to improved efficiency.
